

POST BREADTH: 28MM  
(please note this is a hand-made object, this measurement may vary slightly by 1-2MM)

POST DEPTH: 20MM  
(please note this is a handmade object, the post height can vary slightly by 1-2MM)

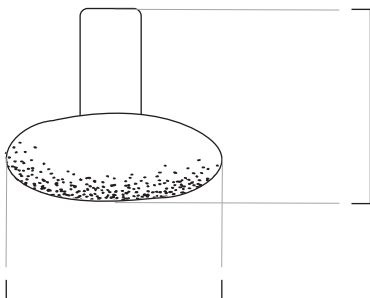

DISTANCE BETWEEN TAPPING POINTS: 10MM  
(please note this is a handmade object, the tapping points are drilled individually by hand. Therefore this measurement can vary slightly by 1-3MM)

DISTANCE FROM CENTRE TO CENTRE OF TAPPING POINTS: 15MM  
(please note this is a handmade object, the tapping points are drilled individually by hand. Therefore this measurement can vary slightly by 1-3MM)

POST WIDTH: 13-14MM  
(please note this is a handmade object, the width varies slightly by 1-2MM along the post)

ENTIRE HIGHT OF HANDLE: 40MM

ENTIRE WIDTH OF HANDLE: 35MM

## OCEAN STONES

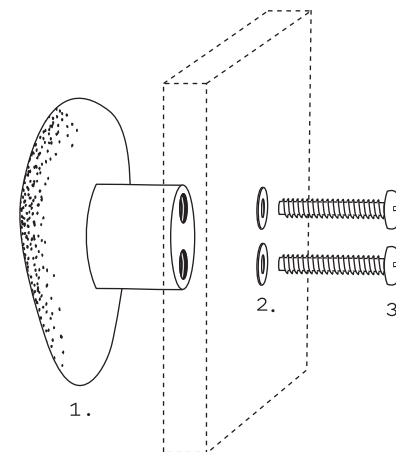

BRONZE HARDWARE BY OKO OLO

Each OKO OLO bronze handle is hand cast from individual Ocean Stones collected from shore lines along the New South Wales coast of Australia. Cast at a fine arts foundry in Sydney using an intricate lost-wax process, each casting creates a new surface, leaving no two handles the same. Each piece is finished individually by hand to create a unique patina.

### CARE INSTRUCTIONS

If unused, bronze will characteristically begin to dull and darken; therefore, using these handles as a daily touch-point is beneficial to the level of both shine and colour. And will prevent oxidization.

1. If the handle is left untouched, buffing with a cotton cloth rag weekly or fortnightly is recommended, the surface will eventually settle.
2. If the handle is left untouched, it may brown and dull over time. Use a small dab of 'Autosol Metal Polish'(can be purchased on-line)  
-spread a thin film of polish over the handle and leave for 20 seconds, clean off the polish with a soft cotton rag. Repeat if necessary.

### MATERIALS

1.Brass metric screw 5MM width / 25MM length

2.Brass Washer

3.Ocean Stone Bronze handle

#### NOTE:

-Strong Chemical(glue)fix recommended for all handles with a single fixing point.
