Me and You was born out of minor calamity: a glass fitting from a vintage wall sconce was irreparably broken during a Flack install. With the back plate already in place, Flack called on Volker Haug to urgently design a new, site-specific fitting.

The incident was a potent reminder of the powerful possibilities for collaboration, and it fast developed into a provocation for more expansive creation.

Inspired by the vintage sconce's fixed back plate dimensions, these were set as an initial constraint for investigations with material and form. The studios began toying through different models, metals and attributes within these physical and artistic confines. Eventually, they loosened ties on their parameters to allow an uncompromised, natural design process to take over.

Fueled by simpatico and shared aesthetic sensibilities, a long history of friendship, and neighbourly proximity, the rapid-fire

nature of ideating, prototyping, and editing was an experience of total cohesion. The error that instigated the collaboration ultimately gave rise to a playful and friendly design process.

As the name suggests, Me and You speaks to the collaboration, but also to the inherent interplay of light and space—a relationship that the studios believe is perhaps the most important decision of the design process. The duet between lighting and its environments determines atmosphere, and soft-spokenly holds immense power in forming an experience. With this in mind, the studios envisioned Me and You participating and interacting in space all at once.

The collection represents Flack and Volker Haug's shared belief in the truth of materials, and their innate ability to speak for their own beauty and radiance.
